

Thank you for your interest in our Regenerative treatment. We offer Mesenchymal Stem Cells (MSCs) which are autologous Bone Marrow-Derived MSCs (self-donated, not cultured or expanded). Below is a brief synopsis about our procedure and fees. We would be happy to discuss your candidacy in more detail with you; please feel free to email your questions to us.

**Regenerative treatments utilizing Mesenchymal Stem Cells do not require FDA approval and are available outside of a study. The following is just a brief summary of our Regenerative treatments.**

### **Premier Regenerative Stem Cell and Wellness Centers Regenerative Treatment Options**

The use of stem cells holds the promise of making regenerative medicine a reality for the treatment of degenerative and traumatic conditions. Mesenchymal stem cells (MSCs) promote the formation of bone, cartilage, ligament/tendon, and dermal tissues. MSCs are available from many sources including autologous (self-donated) bone marrow aspiration, adipose-derived and dental pulp (the center part of the tooth made up of connective tissue and cells).

#### **Autologous Bone Marrow-Derived Cells (BMC)**

The use of concentrated bone marrow aspirate (BMC) as a stem cell preparation is a simple and safe way of utilizing the regenerative potential of stem cells to affect tissue regeneration. This is a 30 minute office-based procedure utilizing the patient's own cells harvested through the iliac crest (hip). The bone marrow aspirate is run through a centrifuge during which the cells are separated and captured. Once separated, the concentrated cells are injected into the painful disc or joint.

#### **PRP – Platelet Rich Plasma**

Platelets – obtained by a simple blood draw – are tiny cells that contain thousands of growth factors that control and regulate your natural healing process by recruiting stem cells to the injured site. By concentrating the growth factors (cytokines) and injecting them at the site of injury or pain, healing can be achieved over the span of two to three months. We call this procedure platelet-rich plasma (PRP), which takes fewer than 30 minutes to conduct at our facility.

#### **Benefits of having follow-up treatment with PRP**

Platelets stimulate the regeneration of the stem cells. This treatment would be beneficial two to six weeks following stem cell injections to provide your body with a natural boost to continue the stem cell signaling process.

#### **Benefits of having ASC via IV**

The MSCs in the IV infusion can move to the areas being affected by the immune system, or breakdown in defenses, and act as the “generals” of the surrounding cells, providing chemical signals, growth factors and immuno-modulating molecules to coordinate repair, decrease inflammation to healthy levels and prevent damaged cells from dying. These same MSCs form the major component of the blood-brain-barrier, which is a system of cells lining the blood vessels in the brain that prevents most immune cells and other toxic or unnecessary proteins/chemicals and bacteria and viruses out. When something goes wrong in the blood-brain-barrier, unwanted matter can penetrate the barrier such as T-Killer cells in multiple sclerosis, and protein aggregates in ALS, Alzheimer's and possibly Parkinson's. Therefore, when we infuse healthy MSCs, they can temporarily restore order to the immune system of the body and brain, slowing or even stopping degenerative diseases, while treating many of the serious symptoms.

Treatment	Procedure	Current Rate
Autologous BMC	Up to Two Injection Sites	\$7,000.00 for up to 2 joints/discs
Autologous BMC	Intravenous Injection	\$7,000.00 for the first procedure, \$3,500.00 for additional procedures
Autologous BMC	Add on Intravenous Injection with Stem Cell Therapy	\$1,800.00
Additional Injection Sites	Each injection site after the first two	\$850.00
PRP Treatment	Up to Two Injections	w/Sedation \$2,500.00
PRP Treatment	Additional Injections	\$250.00/ per site
PRP Stem Cell Therapy	Up to Two Injections	Pre- Stem Cell Therapy \$2000.00 Post Stem Cell Therapy \$1,000.00
PRP Hair or Facial Treatments	Biologic treatment for aesthetic results	\$2,500.00/with Sedation
Stem Cell Hair or Facial Treatments	Biologic Treatment for aesthetic results	\$7,000.00

**Premier Regenerative Stem Cell and Wellness Centers accepts cash and credit cards. Please inquire about our payment plans and financing options. We require 50% of your payment at the time of scheduling your procedure and must be paid in full on the day of your appointment.**

\*\*If the procedure is not 50% or more effective at 6-12 months, I may choose to repeat the procedure for 50% of the total **current** cost. Any additional body parts are \$850 per body part if you have not been previously injected.

You must understand this procedure is still considered as experimental and is **NOT** guaranteed and that there will be **NO REFUND** if the results are not as expected.

You must understand if you have had previous surgery to a disc which is being injected with ASC, this disc may be weaker and there is potential this procedure could increase a herniation or bulge to this disc.

All procedures performed at the Premier Regenerative Stem Cell and Wellness Centers (PRSC) are **NOT** covered by Medicare or Private Health Insurance.

You **MUST** have an MRI or CT scan for spine evaluation and/or x-ray for peripheral joints which is less than ONE year old when you are to be evaluated by the physician to see if you are an appropriate candidate for stem cell therapy or PRP.

Thank you again for your interest and we look forward to your questions.

## **Stem Cells and United States Regulations**

**The Premier Regenerative Stem Cell and Wellness Centers** is not offering stem cell therapy as a cure for any condition, disease, or injury. All statements and opinions are provided for educational and informational purposes only. Do not diagnose or treat via this informational package.

**The Premier Regenerative Stem Cell and Wellness Centers** facilitates individuals seeking autologous stem cells (one's own cells), platelet rich and platelet poor plasma, and adipose-derived cells.

Cellular products are delivered to physicians who have been approved to prescribe and administer cellular therapies to patients in need. All cellular products are lawfully manufactured and regulated under strict FDA and United States guidelines.

**The Premier Regenerative Stem Cell and Wellness Centers** does not claim that any applications, potential applications, or use of these cellular products are effective, nor claim that these therapies work for any listed or unlisted condition, intended or implied. It is important for potential consumers to do their own research based on the options presented so that one can make an informed decision.

**ATTENTION:** If you have ANY concern with the cellular therapies, methods, website, or techniques and are concerned about **The Premier Regenerative Stem Cell and Wellness Centers**, please discuss stem cell therapy with your primary care physician, and ask your physician to contact us for further assurances.

These statements have not been evaluated by the Food and Drug Administration. The cellular products utilized by **The Premier Regenerative Stem Cell and Wellness Centers** are not guaranteed to diagnose, treat, cure, or prevent any disease.

Testimonials represent a cross section of the range of results that appear to be typical with these products. Results may vary depending on each individual patient.
